

## » case story

## We asked a Bank in Portugal

### Why did you choose the SC 8200?

We needed to fulfil the ECB framework requirements and being a small bank we need versatile machines. With SC 8200 we can combine the usual banknote counter with a certified ECB framework fitness sorter. The other options were to invest in CIT services or recycling machines, but these would limit our autonomy and are too expensive.

We decided to test all the available machines in Portugal that included the fitness option. Some were too big to fit at our front desk and some were too expensive. Some didn't have a good display and some were difficult to operate. SC 8200 came out on top with its small size, good price, big display, user-friendly navigation and superior support organization.

### Which business benefits or effects have you seen?

SC 8200 is the perfect solution for fitness sorting and the ideal machine to replace the old banknote counters. Because of the user-friendly interface, the cashiers need very limited training (less than 10 minutes).

Last but not least, this investment has given us the opportunity to decentralize authenticity and fitness sorting from our main treasury – giving our branches independence and flexibility.

“SC 8200  
is the  
perfect  
solution for  
fitness  
sorting”
